Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 15, 2004 has been entered.

Claim Rejections - 35 USC § 112

Claim 18 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In lines 6 and 7, "a filter screen deposited on said emitting unit" is directed to new matter.

Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no nexus between "a placement unit" in line 3 and the remaining elements in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3749

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Whitfield in view of Haslebacher. Whitfield discloses the claimed invention except for the filter screen and the plurality of slots. Haslebacher teaches that it is known to provide a clean air supply assembly with a grill as set forth at column 14, lines 19-28. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the air filter of Whitfield with a screen, as taught by Haslebacher in order to prevent a person's finger or fingers from touching the final filter which could destroy the integrity of the filter. As to the plurality of slots, Whitfield discloses a perforated metal plate. For the perforation to be slots, even as shown by the platform or floor, would constitute an obvious matter of design choice, moreover, it would be obvious for the perforation to be slots in view of Whitfield own teaching at column 4, lines 10-13.

Election/Restrictions

Claims 2-7 and 9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Response to Arguments

Applicant's arguments filed March 16, 2004 have been fully considered but they are not persuasive. Contrary thereto, Whitfield discloses a work table having a support base (platform or floor 21), a work surface having a plurality of airflow slots thereon (perforated metal plate 36), a peripheral edge, a plurality of airflow slots on the periph-

eral edge (note, the total platform or floor 21 is perforated which meets this limitation), and a placement unit (any additional element of Whitfield may be considered to be a placement unit, e.g., the cleaner 56 or the blower 44).
